

TUNAR AHMADZADA

Baku, Azerbaijan | +994 55 232 88 53 | twnarx@gmail.com
School No. 85 | GPA: 5.0 / 5.0

SUMMARY

11th-grade student pursuing independent work at the intersection of artificial intelligence and computational mathematics. Selected as one of four students nationwide to represent Azerbaijan at the International Olympiad in Artificial Intelligence (IOAI), earning a Gold Medal at the National Round. Research in algorithmic number theory received national recognition at ISEF, while an applied computational project received NASA's Galactic Problem Solver award. Seeking to build on this research-driven foundation through rigorous undergraduate study in Computer Science and Artificial Intelligence.

SKILLS

Python Programming • Machine Learning • Arduino & Robotics • Mathematics • Event Coordination • Community Engagement • Collaboration Techniques • Ethical Judgment • Volunteer Leadership

EXPERIENCE

Member — The Junior Academy, The New York Academy of Sciences *Sep 2026 – Present*

- Selected as a member of a global community of high-achieving high school students, collaborating on interdisciplinary projects addressing real-world challenges.

Delegate & Participant — International Olympiad in Artificial Intelligence (IOAI) *Aug 2026*

Astana, Kazakhstan

- Represented Azerbaijan's National Team after earning a Gold Medal at the National Round; selected as 1 of 4 students nationwide to advance to the international round.

Participant — Leva Mathematical Camp (LMK)

Aug 2026 – Present

Leva Science Community, Türkiye (Remote)

- Completed a two-stage admissions process for an online cultural and academic exchange program with participants from middle school through university level across multiple countries.

Local Lead — NASA Space Apps Challenge

July 2026 – Present

Mingachevir, Azerbaijan

- Lead the Mingachevir Local Event of the NASA International Space Apps Challenge, a global hackathon engaging 480,000+ participants across 190+ countries since 2012.
- Direct the local chapter's two-day hackathon, coordinating outreach, mentorship, and judging with NASA's Global Organizing Team to connect Azerbaijani innovators with NASA's open data and Space Agency Partners.

Co-Founder & Community Administrator — Texnosfer

June 2026 – Present

- Co-founded and administer a nonprofit technology community offering free webinars, seminars, and problem-solving discussions to tech enthusiasts of all ages.
- Run free, open-to-all competitions with prizes for community members.

Volunteer Judge — Technovation Girls

Apr 2026 – Jun 2026

- Evaluated mobile application submissions for a global entrepreneurship competition spanning 50+ countries; earned Technovation's Gold Certificate for excellence in evaluation and mentorship.

National Ambassador — International Youth Math Challenge (IYMC)

Mar 2026 – Present

Baku, Azerbaijan

- Spearheaded local promotion and organized peer study groups, guiding participants through the Qualification and Pre-Final rounds of a mathematics competition spanning 100+ countries.

Participant — Leva “First Round” Virtual Mathematics Camp

Feb 2026 – July 2026

Leva Science Community, Türkiye (Remote)

- Engaged in a competitive national training camp emphasizing mathematical proof techniques and olympiad-level problem solving.

PROJECTS

Common Divisibility Framework for Prime Numbers

2026

ISEF National Round — Mathematics Category

- Researched divisibility properties of prime numbers and developed a single generalized algorithm for determining divisibility by any positive integer, unifying classical divisor-specific rules into one method.
- Presented findings at Azerbaijan's national ISEF qualifying round, earning a Bronze Medal in Mathematics against republic-level candidates. Preprint: <https://doi.org/10.5281/zenodo.21335786>

Space Debris Recycling System — NASA Space Apps Challenge

2025

Global Hackathon

- Designed a device concept enabling in-orbit space debris to be repurposed as raw material and 3D-printed on-site into spare parts for spacecraft and station maintenance.
- Engineered the computational solution within a 48-hour international hackathon, applying data analysis and rapid-prototyping methods to model the debris-to-part production workflow; awarded NASA's “Galactic Problem Solver” distinction.

HONORS & AWARDS

- International Olympiad in Artificial Intelligence (IOAI) — National Round, Gold Medal *2026*
- International Philosophy Olympiad (IPO) — National Round, Silver Medal *2026*
- International Economics Olympiad (IEO) — National Round, Bronze Medal *2026*
- International Science and Engineering Fair (ISEF) — National Round, Bronze Medal *2026*
- NASA Space Apps Challenge — Galactic Problem Solver *2025*
- Others: National Science Olympiads — Finalist: Astronomy, Statistics (*2025-2026*); Semi-Finalist: Mathematics, Computer Science, Physics, Chemistry (*2023-2026*)

CERTIFICATIONS

Elements of AI — University of Helsinki

Programming for Everybody — University of Michigan

Arduino & Microcontrollers (MCUs) — METU (ODTÜ)

LANGUAGES

Azerbaijani (Native) • Turkish (Fluent) • English (Fluent)

HOBBIES

Plant Growing & Gardening, Violin, Piano, Cooking
